What is the SFPUC Calling For Regarding Reductions in Water Use?

- SFPUC released its final Water Supply Availability Update for 2021 on April 15, 2021
- Supplies situation
 - Hetch Hetchy Reservoir is predicted to fill by the end of the water year given demand levels and snowmelt
 - The entire system (primarily “water bank” will not fill
- SFPUC’s water use reduction goal
 - Maintain summertime water use at no more than 2019, pre-Pandemic levels
- SFPUC’s Ask of its retail and wholesale customers (to achieve goal)
 - Retail (SF City) customers to voluntarily reduce irrigation use by 10 percent
 - Wholesale Customers to voluntarily implement approaches to control/ lower summertime peak use such that it does not exceed 2019 levels
- State could request or require further water conservation activity in the future if necessary
